

CONTENTS

Chapter 1 **Computer Graphics**

1 - 140

1.1	<i>Introduction</i>	2
1.2	<i>Geometric Transformations</i>	2
1.3	<i>Formulation</i>	3
1.4	<i>Translation</i>	4
1.5	<i>Rotation</i>	6
1.6	<i>Scaling</i>	9
1.7	<i>Reflection (Mirror)</i>	10
1.8	<i>Shear</i>	11
1.9	<i>Homogeneous Coordinates</i>	12
1.10	<i>Inverse Transformations</i>	14
1.11	<i>Concatenation or Composite Transformations</i>	15
1.12	<i>Solved Examples</i>	20
1.13	<i>Mapping of Geometric Models</i> <i>(Coordinate Transformations)</i>	68

1.14	Solved Examples	71
1.15	Three Dimensional Transformations	81
1.16	Projections of Geometric Models	83
1.17	Transformations for Orthographic Projections	85
1.18	Isometric Projections	89
1.19	Perspective Projections	90
1.20	Solved Examples	92
1.21	Introduction to OpenGL	111
1.22	OpenGL Rendering Pipeline	113
1.23	OpenGL Commands Notation.....	114
1.24	OpenGL Coordinate System.....	119
1.25	OpenGL Programs	120
	Exercises	137
	Problems	138

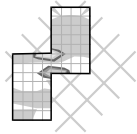

Chapter 2

Geometric Modeling

141 - 260

2.1	Introduction	142
2.2	Model Structure Organisation	142
2.3	Wire Frame Modeling	142
2.4	Real Objects and Wire Frame Models	146
2.5	Representing Curves in CAD / CAM	148
2.6	Basics of Vector Algebra	151
2.7	Lines.....	157
2.8	Solved Examples	159
2.9	Circles	176
2.10	Solved Examples	179
2.11	Ellipses	186
2.12	Solved Examples	188
2.13	Parabolas	192
2.14	Hyperbolas	195
2.15	Conics	196
2.16	Synthetic Curves	199

2.17	<i>Hermite Cubic Splines</i>	203
2.18	<i>Solved Examples</i>	206
2.19	<i>Bézier Curves</i>	210
2.20	<i>Solved Examples</i>	213
2.21	<i>B-spline Curve</i>	218
2.22	<i>Surface Modeling</i>	219
2.23	<i>Kinds of Surfaces</i>	220
2.24	<i>Introduction to Surface Representation</i>	225
2.25	<i>Solid Modeling</i>	227
2.26	<i>Considerations in Storing Solid Model Data</i>	227
2.27	<i>Representation Schemes for Solid Models</i>	228
2.28	<i>Euler's Equation</i>	237
2.29	<i>Feature Based Modeling</i>	239
2.30	<i>Applications of Solid Modeling</i>	242
2.31	<i>Parametric and Constraint Based Modeling</i>	243
2.32	<i>Solved Examples</i>	245
2.33	<i>Mass, Area and Volume Calculations</i>	251
	<i>Exercises</i>	252
	<i>Problems</i>	255

Chapter 3

Finite Element Analysis

261 - 526

3.1	<i>Introduction</i>	262
3.2	<i>Steps in Finite Element Analysis</i>	263
3.3	<i>Types Of Elements</i>	266
3.4	<i>One Dimensional Linear Modeling</i>	269
3.5	<i>Natural or Intrinsic Coordinate System</i>	271
3.6	<i>Shape Function in Natural Coordinate System</i>	272
3.7	<i>Solved Examples</i>	275
3.8	<i>Displacement, Strain and Stress Relationships</i>	280
3.9	<i>Element Stiffness Matrix - Potential Energy Approach</i>	281
3.10	<i>Element Stiffness Matrix - Galerkin Approach</i>	284
3.11	<i>Elimination Approach</i>	289
3.12	<i>Solved Examples</i>	291

3.13	<i>Penalty Approach</i>	355
3.14	<i>Solved Examples</i>	356
3.15	<i>Thermal Effects in 1D Elements</i>	362
3.16	<i>Solved Examples</i>	365
3.17	<i>Quadratic Shape Function</i>	378
3.18	<i>Displacement, Strain and Stress for Quadratic Element</i> ..	381
3.19	<i>Element Stiffness Matrix for Quadratic Element</i>	383
3.20	<i>Analysis of Trusses</i>	386
3.21	<i>Thermal Effect in Truss Member</i>	389
3.22	<i>Solved Examples</i>	390
3.23	<i>Banded and Skyline Methods</i>	427
3.24	<i>Boundary Conditions</i>	428
3.25	<i>Plane Stresses and Plane Strains</i>	433
3.26	<i>Principles for Two Dimensional Problems</i>	435
3.27	<i>Constant Strain Triangular Element</i>	440
3.28	<i>Constant Strain Triangular Element - Shape Function</i>	441
3.29	<i>Constant Strain Triangular Element Stiffness Matrix</i>	447
3.30	<i>Solved Examples</i>	452
3.31	<i>Four node Quadrilateral Element</i>	496
3.32	<i>Element Strain for a Quadrilateral Element</i>	498
3.33	<i>Numerical Integration Methods</i>	504
3.34	<i>Solved Examples</i>	505
3.35	<i>Functions and Phases in FEA Software</i>	515
	<i>Exercises</i>	517
	<i>Problems</i>	520

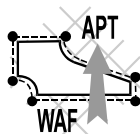

Chapter 4

Computer Aided Manufacturing

527 - 570

4.1	<i>Introduction</i>	528
4.2	<i>Applications and Phases in CAM</i>	528
4.3	<i>Integrating CAD, NC and CAM</i>	531
4.4	<i>Advantages of CAD / CAM</i>	532
4.5	<i>Numerical Control of Machine Tools</i>	532

4.6	<i>Elements of NC Manufacturing System</i>	533
4.7	<i>Preparing CAD Data for NC</i>	538
4.8	<i>Types of NC Systems</i>	540
4.9	<i>Axes of Machine Tools</i>	542
4.10	<i>Coordinate System and Machine Motions</i>	544
4.11	<i>Position and Motion Control in an NC System</i>	548
4.12	<i>Steps in NC Manufacturing</i>	550
4.13	<i>Applications of NC Machine Tool</i>	552
4.14	<i>Advantages and Disadvantages of NC Technology</i>	553
4.15	<i>Limitations of Conventional NC</i>	554
4.16	<i>Computer Numerical Control (CNC) Technology</i>	555
4.17	<i>CNC controllers</i>	556
4.18	<i>Features and Advantages of CNC</i>	558
4.19	<i>Adaptive Control</i>	559
4.20	<i>Advantages of Adaptive Control</i>	562
4.21	<i>Direct Numerical Control (DNC)</i>	563
4.22	<i>Types of DNC</i>	565
4.23	<i>Advantages and Disadvantages of DNC</i>	567
4.24	<i>New Trends in CNC, DNC</i>	567
	<i>Exercises</i>	568

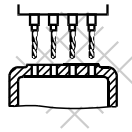

Chapter 5
Part Programming

571 - 726

5.1	<i>Manual Part Programming</i>	572
5.2	<i>Principles of an NC Program</i>	572
5.3	<i>Word Address Format (WAF)</i>	573
5.4	<i>Machining Formulas</i>	580
5.5	<i>Solved Examples (2 Axes - Drilling and Milling)</i>	582
5.6	<i>Tool Length and Cutter Diameter Compensation</i>	589
5.7	<i>Canned Cycles for Milling and Drilling</i>	592
5.8	<i>Solved Examples (2½ Axes - Drilling and Milling)</i>	595
5.9	<i>Subprogram or Subroutines</i>	620
5.10	<i>DO Loop</i>	620

5.11	Macros	621
5.12	Solved Examples	622
5.13	CNC Lathes	628
5.14	Diameter versus Radius Programming	629
5.15	Solved Examples	630
5.16	Canned Cycles on Lathes	640
5.17	Solved Examples	647
5.18	Computer Assisted Part Programming	672
5.19	Languages in Computer Assisted Programming	673
5.20	Structure of APT	673
5.21	Repetitive Programming using APT	687
5.22	Solved Examples	688
5.23	CAD/CAM Systems for Part Programming	718
	Exercises	718
	Problems	719

Chapter 6 Automation

727 - 766

6.1	Concepts in Manufacturing Systems	728
6.2	Definition of Automation	730
6.3	Types of Automation	731
6.4	Advantages and Limitations of Automation	734
6.5	Strategies in Automation	736
6.6	Group Technology	738
6.7	Merits and Demerits of Group Technology	742
6.8	Concept of a Machine Cell	743
6.9	Flexible Manufacturing System (FMS)	744
6.10	Elements of FMS	744
6.11	Workpiece Handling	749
6.12	Workpiece Transport using Automated Guided Vehicle System (AGVS)	751
6.13	Automated Storage / Retrieval Systems (AS/RS)	752
6.14	Types of AS/RS	754

6.15	<i>Applications of FMS</i>	755
6.16	<i>Planning and Implementation of FMS</i>	756
6.17	<i>Merits and Demerits in FMS</i>	757
6.18	<i>Computer Integrated Manufacturing (CIM)</i>	757
6.19	<i>Machining Centres</i>	760
	<i>Exercises</i>	765

Chapter 7
Robot Technology

767 - 802

7.1	<i>Industrial Robot</i>	768
7.2	<i>Robot Joints and Degrees of Freedom</i>	769
7.3	<i>Robot Drives</i>	772
7.4	<i>Robot Controller Unit (RCU)</i>	773
7.5	<i>Manipulator</i>	774
7.6	<i>Tooling or End Effectors</i>	775
7.7	<i>Robot Applications</i>	781
7.8	<i>Robot Cell Layout</i>	785
7.9	<i>Types of Robots</i>	787
7.10	<i>Robot Axes and Configurations</i>	789
7.11	<i>Robot Sensors</i>	791
7.12	<i>Parameters in Robot Selection</i>	794
7.13	<i>Robot Programming</i>	799
	<i>Exercises</i>	801

Alphabetical Index

i - ix
